MACFARLANE REPRINT COLLECTION ***Collection No. 103***

Abstract

The collection consists of botany reprints. Cytological and genetical studies of various species comprise a major portion of the material.

Scope and Content

The collection consists of botany reprints gathered by Eileen Whitehead Erlanson MacFarlane. Included are articles on the cytology and genetics of various species, plant families, plant breeding, climatic conditions as related to plant growth, the structure and physiology of flowering plants, fruit growth and diseases, grasses, fungi, shrubs, trees, forests, and on the flora and vegetation of the Americas, Canada, the Philippines, and other areas of the world.
